

## **Evolution doesn't add up in Mathematics.**

- 1) What are the chances of randomly typing the word evolution? 1 in 26<sup>9</sup>. or 1 in 5,429,503,679,000.
- 2) What are the chances of shuffling cards numbered 1 to 20 and laying them down in the right order? 1 in 20! or 1 in 2,432,902,008,176,640,000.
- 3) What are the chances of randomly laying down cards numbered 1 to 200 in the proper order? 1 in 10<sup>375</sup>.
  - 1) Grouping all electrons in the universe into groups of 200 only gives you 5 x 10<sup>77</sup> possible combinations.
  - 2) Add time. Do 1 billion recombinations a second for 30 billion years which give 10<sup>24</sup> new possible recombinations.
  - 3) That only give 5 x 10<sup>104</sup> possibilities, way short of 10<sup>375</sup> possible recombinations necessary.
- 4) The most basic amino acid is an ordered 400 piece set.
- 5) The chance occurrence of the proper ordering of the components of self-replicating DNA in a blender is 1 in 10<sup>167,626</sup>.
- 6) Mathematicians consider anything beyond a 1 in 10<sup>50</sup> possibility statistically impossible.

**Evolution doesn't add up**

## Scientific Reasons to Believe Your Bible

### Creation vs. Evolution

Quotes from the July 29, 2002 issue of U.S. News and World Report. Cover article entitled, “The New Reality of Evolution: Where we came from and where we are going.”

By now, scientists say, evolution is no longer “just a theory.” It’s an everyday phenomenon, a fundamental fact of biology as real as hunger and as unavoidable as death.

Scientists have confirmed virtually all of Darwin’s postulates.

I’m begging people to treat evolution as a science and not just tack it on as an explanation afterwards.

The evidence against evolution amounts to little more than “I can’t imagine it,”...

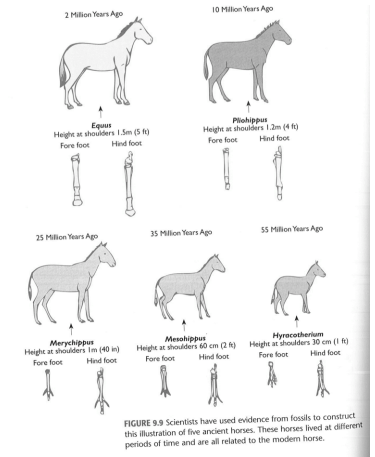

### Evolution doesn’t add up in Geology.

#### The Geological Column

- 1) It is based on circular reasoning
- 2) The geological column only exists in theory.
- 3) There are countless examples of objects from one layer mixed with objects from another layer.

### The Modern Horse

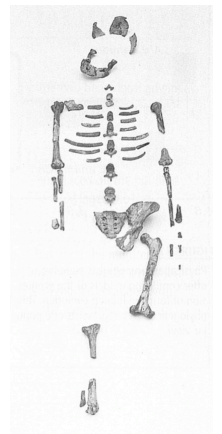

- 1) No complete set of horse fossils exists in the world.
- 2) To follow horse fossil evolution, they start in North America, then are only found in Europe, then switch back to being found only in North America.
- 3) There are no transitional fossils between the different types of horses.
- 4) Recent archaeological digs have unearthed fossils of full-size modern horses existing with fossils of early horse ancestors.

### Lucy

### Questions Evolution Can't Answer.

- 1) How did something come from nothing?
- 2) What bridged the gap between matter and life?
- 3) Where are the transitional fossils?

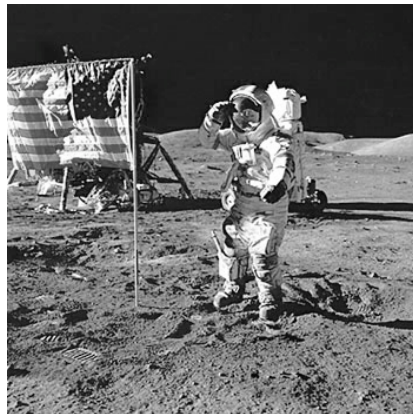

- 4) Fossilization is no longer a regularly occurring event on planet earth.

Mass fossilization is evidence of a global cataclysmic hydraulic event.

## Radioactive Dating

- 1) It assumes there were no daughter elements in the rock to begin with.
- 2) It assumes the rate of radioactive decay is constant.
- 3) Water seepage migrates both radioactive elements and daughter elements into and out of the rock.

## Meteoric Dust

## Evolution doesn't add up in biology.

### Sea Slugs

### Bombardier Beetles
